ABOUT

AI Engineer focused on building LLM-powered applications, RAG systems, and personalized recommendation systems. Experienced in Python, LangChain, LangGraph, vector search, NLP, and machine learning, with hands-on experience in backend development and AWS cloud infrastructure.

SKILLS

AI & GenAI: LLMs, RAG, LangChain, LangGraph, Hugging Face, NLP, BERT, FAISS, ChromaDB, TensorFlow, Scikit-learn

Languages & CS: Python, JavaScript, SQL, Data Structures & Algorithms (DSA)

Backend & Cloud: Django, Django REST Framework, Flask, React.js, REST APIs, AWS, Docker, Kubernetes, Terraform, Jenkins, GitHub Actions, CI/CD

Databases & Tools: MySQL, PostgreSQL, Git, Linux, Scrapy

EXPERIENCE

Programmer Analyst Trainee

@Cognizant Technology Solutions, Bengaluru

Mar 2026 – Jun 2026

- Automated cloud infrastructure provisioning and CI/CD workflows using **Terraform, Docker, Kubernetes, and Jenkins**, enabling repeatable deployments across environments.
- Built and configured **AWS infrastructure** across **EC2, S3, VPC, RDS, Lambda, IAM, CloudWatch, and Route 53**, supporting application deployment, access management, monitoring, networking, and service availability.

PROJECTS

Enterprise Knowledge Assistant | Agentic RAG Documentation Assistant | [GitHub](#)

Tech Stack: Python, LangChain, LangGraph, Flask, ChromaDB, Hugging Face, Google Gemini

- Built an agentic RAG workflow using LangChain and LangGraph, enabling LLM-driven tool selection, stateful multi-turn conversations, and context-grounded responses with source citations.
- Processed **850+ enterprise documentation pages into 6,100+ chunks**, generating local Hugging Face embeddings and indexing them in ChromaDB; integrated Google Gemini for context-aware generation through a Flask REST API.

Ani-verse | Full-Stack Anime Recommendation Platform | [GitHub](#) | [Deployment](#)

Tech Stack: React.js, Django, Django REST Framework, PostgreSQL, BERT, FAISS, Scrapy

- Built a full-stack recommendation engine for **14,000+ anime records**, combining BERT-based semantic search with personalized recommendations through Django REST APIs.
- Implemented **FAISS vector search** and a **LinUCB contextual bandit** to personalize rankings from user interaction history while balancing exploration and exploitation.

CERTIFICATIONS

- | | |
|---|---------|
| Amazon Web Services Cloud Practitioner (CLF-C02) | 07/2026 |
| Claude Certified Architect – Foundations (CCA-F) | 06/2026 |
| Claude Code 101 by Anthropic Academy (Credential) | 06/2026 |

EDUCATION

College of Engineering, Chandigarh Group of Colleges

2022 - 2026

Bachelor of Technology in Artificial Intelligence & Machine Learning | CGPA: 8.31/10

Landran, Punjab
